Vital Force LLC

Capabilities Overview

Practical, hands-on expertise in cell culture and bioprocessing for biotech and pharmaceutical organizations. Based in Logan, Utah, and serving clients globally.

Services

Scientific Consulting	Process development, statistical design, formulation support, regulatory strategy, and intellectual property guidance.
Contract Research & Testing	Cell culture performance testing, application data generation, analytical support, and technical reports.
Educational Programs	Hands-on training and science education for students and professionals in the life sciences.

How Engagements Work

Free 30-minute intro call — Understand your needs and determine fit.

One-off advisory — Focused recommendations, typically completed in 1–2 weeks.

Scoped project — Defined deliverables over 4–12 weeks with a final report.

Ongoing support — Regular advisory or technical support on a retainer or phased basis.

Experience Highlights

• Hands-on process development and optimization for cell culture systems used in vaccine and biotherapeutic production.

• Application testing programs generating data packages for product launches and technical support.

• Strategic consulting including technology roadmaps, process design, and regulatory guidance.

• Leadership of cross-functional R&D; teams at major life sciences suppliers.
